

Companies across Colorado have sought out MODIS to deliver skilled, dedicated IT professionals. We always seek to deliver competitive and sought-after career opportunities to our potential consultants and employees.

Job Description

We are currently seeking a Network Engineer for client in Downtown Denver. We invite you to review the position requirements below and apply today if your skills match our need.

Position Type: Contract to Hire or Direct to Hire

Duration:

Location: Downtown Denver

The ideal candidate will have 4 to 5 years experience in a converged Cisco environment, with top level support and customer service skills. This individual will have primary responsibility for deploying, maintaining, upgrading, troubleshooting and monitoring a Cisco based router and switch environment. Ordering, installing and maintaining WAN and Metro data and voice circuits is also a responsibility of this position.

The position will report to the senior network administrator and will be the primary first support contact for all network issues. The position will be trained (no previous experience required) on Riverbed WAN acceleration, Cisco VoIP and Cisco Callmanager/Unity and will act as the backup administrator for these systems.

This a rare and excellent opportunity for a network administrator to gain in skill and responsibility with a public, fast growing and fast moving company.

Candidate will be mainly responsible for installing, maintaining, troubleshooting and monitoring the following systems companywide:

- Cisco routers.
- Cisco switches.
- Cisco wireless access points
- WAN data and voice circuit quality of service company wide.

Additional responsibilities include the following, but no current expertise required (training will be provided for all the following upon hire):

- Backup for Cisco router gateway and switch configuration to support VoIP systems company wide.
- Backup for Cisco phone deployment and support company wide (MLA to IT help desk for day to day deployments).
- CiscoSecure ACS.

- Cisco CallManager and Unity support .
- Cisco wireless access points.

Candidate must meet the following requirements to be considered for the position:

- MUST HAVE 4 YEAR COLLEGE DEGREE
- Cisco CCNA or equivalent experience a must.
- Experience working in mid-size network operations or multi-site networks, must have Cisco IOS (router and switch) experience for at least 4 to 5 years.
- Cisco 6500 and 3500 series switches.
- Cisco 2800 and/or 3800 series routers.
