

VeriCour is currently looking for a Cisco Network Engineer for a six month contract opportunity in DTC. There is a possibility for this position to go permanent.

The Cisco Network Engineer will work as part of the IT Global Infrastructure team to ensure that enterprise and regional data and voice networks and related equipment are maintained, supported, optimized, and reliable.

Requirements:

- 3-5 years network administration at the enterprise level, global preferred.
- 3-5 years enterprise routing configuration/management; very proficient with OSPF and BGP, GRE tunnels, IPSec, etc.
- 3-5 years' experience enterprise QOS configuration & management
- Enterprise network switching administration/experience. Cisco Catalyst, Juniper, etc. Preference for Nexus 5K, 7K, 1000v, or any NX-OS experience.
- Experience with Cisco security management a plus; i.e. Cisco ASA, IPS, FW IOS, Cisco Security Manager, etc.
- Experience with enterprise VPN deployment and support a plus. Certificate management/deployment (setting up root CA), DMVPN, client VPN solutions (SSL, IPSec), etc.
- CA Tools experience - configuration, management (eHealth, NetQOS) a plus.

Please send resumes to jcourtney@vericour.com to talk further. Thank you!
